

REVOLUTIONISE

Your Probe Processing with Electronic Traceability.

Ensuring safety, efficiency, and compliance in the management of ultrasound, Transoesophageal Echocardiography (TOE), and cardiac probes is crucial in the fast-paced healthcare environment.

Medical Intelligence Systems offers a cutting-edge solution with our **Vestige** electronic traceability system. Here's why electronic traceability matters and how **Vestige** can transform your probe processing workflow.

Why Electronic Traceability Matters. In healthcare, maintaining the safety and efficiency of medical equipment is paramount. **Vestige** provides a comprehensive solution for managing the reprocessing of ultrasound, TOE, and cardiac probes, ensuring patient safety and regulatory compliance.

CUTTING-EDGE FEATURES FOR OPTIMAL PERFORMANCE.

COMPLIANCE ASSURANCE

Meet all regulatory standards with detailed traceability reports, simplifying audits and inspections.

REAL-TIME TRACKING

Monitor the status and location of each probe throughout the reprocessing cycle, ensuring no equipment is lost or misplaced.

TRANSFORM YOUR PROBE PROCESSING.

ENHANCED SAFETY

By ensuring proper high level disinfection and reducing the risk of cross-contamination, **Vestige** enhances patient safety.

IMPROVED COMPLIANCE

Easily meet regulatory requirements with comprehensive traceability, reducing the risk of non-compliance penalties.

AUTOMATED DOCUMENTATION

Minimise manual input and ensure accurate, complete records of each probe's usage, maintenance, and high level disinfection history.

USER-FRIENDLY INTERFACE

An intuitive design that integrates seamlessly into existing workflows, reducing the learning curve for staff.

DATA SECURITY

Protect sensitive information with advanced encryption and secure access controls, ensuring compliance with data protection regulations.

INCREASED EFFICIENCY

Streamline processes and save time with automated documentation and real-time tracking, allowing staff to focus on patient care.

BETTER DECISION-MAKING

Access detailed data and analytics to optimise workflows, improve resource allocation, and enhance overall efficiency.

UPGRADE YOUR TRACEABILITY SYSTEM.

Whether you have an existing manual probe traceability system and process, wish to combine and/or upgrade to an automated process, or are looking to capture both processes, **Vestige** is your product. **Vestige** digitalises manual processes while securing automated workflows, providing a seamless transition to a more efficient and compliant system.

INTEGRATE WITH KONNECT FOR ENHANCED DATA CAPTURE.

For those looking to replace printers and the very manual process of data capture, our **Konnect** solution from **Medical Intelligence Systems** is ideal.

Konnect utilises multi-communications technology to seamlessly integrate your devices with the cloud, eliminating the need for manual data transfer.

This integration between machine and data ensures effortless connectivity and advanced reporting capabilities, driving proactive management and operational insights.

KEY BENEFITS OF KONNECT:

- Effortless Connectivity: Integrates devices via WiFi, Bluetooth, and Cellular, removing the need for additional IT support or complex network routing.
- Advanced Reporting: Provides real-time insights and web-based reporting, accessible anytime, anywhere.
- Enhanced Management: Enables collective management of multiple devices, improving data access and operational efficiency.
